

Eloise Wender-Clendenin

Continental Elementary School District No. 39

As a Clinical Therapist, with a Masters Degree, I am running for a seat on the Continental Elementary School Governing Board. I believe that an Elementary School Education is the foundation for Adolescents, and development. In the “theory of development” primary education and influential mentors are the stepping stones for what is to come in childhood growth and personal development.

I am a believer in Core Values and the critical importance of parental involvement. Education should be exactly that, reading, writing, math, history, striving for personal academic excellence, with some guidance in appropriate boundaries, impulse control, appropriateness and a sense of community. Children should also be exposed to socialization and the sensitivity of others.

Though I have been retired for several years now, I am compelled to give back to the youth who will become the future generation setting examples. Striving for excellence within one’s ability is what creates a balance in the world. As an elected Board Member I will try to incorporate my vision along with the diverse current existing Board members.

I intend to be an independent voice representing the taxpayers, parents, and grandparents of the various communities and district 39.

I hope with the information I have shared, to the best of my ability, and with the majority of the present Board members that my presence and participation, if elected will make a difference in the lives and education of children.
