### Sahuarita Unified School District No. 30

I attended Sahuarita Unified School District elementary through high school, as did all 3 of my children. I have spent the Majority of my life working directly with youth in many settings. 4H leader, managing a rural summer meals program, working with youth in a drug prevention setting, and serving 2 terms on the Sahuarita school Board previously, and recently being reappointed to the board to fill a vacant seat. The Sahuarita School District is unique. It covers a large landmass made up of both suburban and rural communities. The thing these communities have in common is they all want their children to succeed. In order to accomplish student success we need to continue to maintain and improve our school campuses, school safety has to be a priority, supporting dual enrollment programs while continuing to support and retain our school staff. My time spent supporting the district was an education unto itself when I see how successful our students truly are. I just want to thank the voters for their past trust in me to do the job.
